### REASON FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art of record fails to anticipate or render obvious

"wherein each host in the group is allocated an amount of bandwidth on a network on which the first file delivery transmission occurs, and the processor is further configured to:

share allocated bandwidth of multiple hosts in the group to increase a data transfer rate experienced by the hosts in the group",

and as similarly cited in the remaining independent claims 9, 17 and 23,

in combination with the other limitations of the claims. It is noted that the closest prior art, Sachs et al (US Pub. 2006/0154603) shows when an additional receiver joins an ongoing multicast session, the additional receiver receives packets when connection reaches again the sequence range 0-1000; Bhagavath et al (US 6,163,810) shows a multicast-unicast group is designated to serve the host based on, e.g., zip code or time zone; Chuah et al (US 6,515,994) shows retransmission of the file following the file delivery until all packets are received by all receivers. However, Sachs, Bhagavath and Chuah fail to disclose or render obvious the above quoted limitations as claimed.

Dependent claims, being further limiting to the independent claims, and enabled by the specification, are also allowed.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
